THE GEO PLAYBOOK FOR CLINICS

How a practice gets named by ChatGPT and Google.

Patients now ask an AI who to see. This is how that answer gets built, and the five steps that put a practice in it.

EDITION 2026 EVERY NUMBER SOURCED CAL.COM/SOLVX-AI/15MIN

CONTENTS

01 PATIENTS NOW ASK AN AI WHO TO SEE

02 AN AI ANSWER IS BUILT FROM FOUR KINDS OF PAGES

03 FIVE STEPS, MEASURED EVERY MONTH

04 THREE GAPS TO CHECK FIRST

05 WHAT THIS KIND OF WORK HAS PRODUCED

06 YOUR FIRST 30 DAYS

Who it is for. Owners, COOs and marketing leads at med spas, plastic surgery, dental, dermatology, fertility and eye surgery practices.

Every number names its source; the full list is on the last page. Updated 7 October 2026.

01

PATIENTS NOW ASK AN AI WHO TO SEE

47%

of patients have used AI to research a provider. Nine months earlier it was 31%.

Source: rater8

36%

say AI influenced which provider they chose, ahead of Google search at 34%.

Source: rater8

43%

of health searches on Google now show an AI answer, about double the average.

Source: Ahrefs

> *An AI answer names three or four practices. Not ten links. A practice is in the answer or it is not.*

02

AN AI ANSWER IS BUILT FROM FOUR KINDS OF PAGES

Your own site is one of the four. Most of the gap is on the other three.

INPUT	WHERE IT LIVES
Your own pages	Procedure, city and provider pages
Lists and directories	RealSelf, Zocdoc, Healthgrades, Vitals, local “best of” lists
Patient reviews	Google, RealSelf, Healthgrades
Press and mentions	Local news, society pages, publications

43.8%

of the pages ChatGPT cites are “best of” lists.

Source: Ahrefs

0.664

how closely mentions on other sites track with ChatGPT visibility. The number of pages on your own site: 0.194.

Source: Ahrefs

> *Nobody can pay to be placed in an AI answer. The work is making your practice the one those pages point to.*

03

FIVE STEPS, MEASURED EVERY MONTH

01 BASELINE

The questions your patients ask, each run 10 times in ChatGPT, Google AI Mode and Perplexity. Who is named, how often, and which pages were read.

02 ANSWER PAGES

One page per procedure per city, built on your real numbers and your own clinicians.

03 GET LISTED

The directories and "best of" lists the AI reads for those questions, with complete, matching profiles for every provider and clinic.

04 GET TALKED ABOUT

Local press, society pages and reviews that name the procedure and the city, so other sites say what your site says.

05 MEASURE

The same questions rerun every month. You see mention rate, sources, AI-referred visits and booked consultations.

04

THREE GAPS TO CHECK FIRST

- City mismatch. Procedure pages titled for the metro, while the clinics sit in the suburbs patients name when they ask.
- Location pages that answer no patient questions: an address, a map and nothing an AI could quote.

- Proof that lives only on your own site. Awards, publications and case counts that no directory, list or news page repeats.

05

WHAT THIS KIND OF WORK HAS PRODUCED

Public results, published by the firms that did the work. None are SolvX clients.

PRACTICE	WHERE	PUBLISHED RESULT	WORK BY
Wall Street Dermatology	New York, NY	28% → 40% ChatGPT mention rate: the share of test prompts that named the practice	Halcy
West Michigan Plastic Surgery	Kalamazoo, MI	Named first by Google's AI for "kalamazoo facelift"	Medical Advertising Agency
Richmond Surgical Arts	Richmond, VA	1.17M Google search impressions in 16 months	Medical Advertising Agency
Innovative Dental Aesthetics	Boca Raton, FL	+27% patient appointments	Namami Inc

06

YOUR FIRST 30 DAYS

- [ ] Write down the ten questions patients ask before they book.
- [ ] Ask each one ten times in ChatGPT, Google AI Mode and Perplexity. Note every practice named.
- [ ] List the pages each answer cites. That list is your work plan.
- [ ] Check that robots.txt and your CDN let AI crawlers in.
- [ ] Give every procedure a page per location, with the patient questions answered on it.
- [ ] Claim and complete every directory profile. Same name, address and phone everywhere.

- [ ] Ask for reviews that name the procedure and the city.
- [ ] Run the same questions again next month.

NEXT STEP

FIFTEEN MINUTES. NO PITCH DECK.

Tell us the questions your patients or buyers ask. We will show you who the AI names for them.
