KIND	EXAMPLES	WHAT TO COMPLETE
Health directories	Healthgrades, Zocdoc, Vitals, RateMDs	Every provider: name, speciality, location, booking link.
Aesthetic directories	RealSelf	Procedures offered, before-and-after photos, answers to patient questions.
Maps	Google Business Profile, Apple Maps, Bing Places	Categories, services and hours for each location.
“Best of” lists	City magazines, local guides	Find the lists the AI cites for your questions. Ask to be considered.
Societies	Board and society member pages	A profile for each clinician, linked to their page on your site.

REVIEWS AN AI CAN USE

- Ask every patient, at the same point in every visit.
- A review that names the procedure and the city says what your site says, in a patient’s words.

- Reply to every review, good or bad.
- Never buy reviews or screen who gets asked. It breaks the platforms' rules and US consumer law.

04

GETTING TALKED ABOUT

- Local news and community pages that name the procedure and the city.
- Hospital, society and university pages that list your clinicians.
- Publications and talks, each linked from the clinician's page.

> *The aim is simple: other sites say what your site says.*
